A)

```java
public int countWhitePixel(){
    int maxPix = 0;
    for(int row = 0; row < pixelValue.length; row++){
        for(int is = 0; is < pixelValue.length; is++){
            if (pixelValues[row][is] == White){
                maxPix++;
            } //End if
        } //End for loop 2
    } //End for loop 1
    return maxPix;
} //End countWhitePixel
```
